Climate action
Definition	Official development assistance in relation to the Gross National Income.
Unit	percent [%]
Available dimensions	total
Methodological explanations	<p>Official Development Assistance (ODA) comprises grants and loans that are provided by government agencies or international organizations to promote the economic development and welfare of developing countries. In order for loans to qualify as ODA, they need to comprise a grant element of at least:</p> <p>ODA also includes technical assistance that aims at developing human resources and raising qualifications as well as technical and productive capacity of the developing countries. Technical assistance consists in, i. a., conveying knowledge and experience in the form of training, sending experts and commencing research and/ or covering its resultant cost.</p> <p>No military equipment or services are reportable as ODA.</p> <p>Moreover, it is also required that a partner country benefitting from assistance is on the OECD DAC (Development Assistance Committee) list of ODA recipients.</p> <p>Depending on the form of its realisation, development assistance might be distinguished into:</p> <p>Official Development Assistance in Poland is provided in accordance with the Development Cooperation Act of 16th September 2011 (Journal of Laws of 2011, No 234, item 1386). Polish development cooperation is based on the Multiannual Development Cooperation Programme, developed for a minimum period of four years. In accordance with the document, the development cooperation includes all the actions undertaken by the government administrative bodies in order to provide the developing countries with development assistance and humanitarian aid as well as the implementation of educational actions for raising awareness and better understanding of global issues and interdependencies.</p> <p>The development cooperation in Poland is coordinated by the Ministry of Foreign Affairs that has devised Multiannual Development Cooperation Programme for 2021-2030 in accordance with which the focus of Polish development cooperation has been placed on selected max. 10 Eastern Partnership countries as well as African, Asian and Middle East countries. „Development cooperation plan in 2021” specifies priority geographical coverage to: Belarus, Georgia, Moldova, Ukraine, Lebanon, Palestine, Ethiopia, Kenya, Senegal and Tanzania.</p> <p>Polish development cooperation serves the following thematic priorities: peace, justice and strong institutions, equal chances (education, decent work, entrepreneurship, reduced inequalities, sustainable cities), health, climate and natural resources (clean water and sanitation, forests and biodiversity, renewable energy resources), in alignment with sustainable development goals (16, 4, 8, 10, 3, 6, 11 and 13). Activities included in the programme are financed with the resources from the Ministry of Foreign Affairs</p>

Statistics for the SDGs - indicators for national priorities

	<p>Republic of Poland from target reserve of the state budget, designed for the development cooperation, and from the funds of other ministries.</p> <p>Least Developed Countries (LDCs) - the countries with the lowest levels of socio-economic development, which meet the following three criteria: average income per capita below \$ 1018 for 3 years, low human resources (malnutrition, high mortality, low level of education) and the sensitivity of the economy (dependence on the production of raw materials or agricultural products). The list of LDCs covers about 50 countries (most of them are African countries).</p> <p>Gross National Income (GNI) - the gross primary income of all property sectors or all national institutional sectors it is the sum of gross domestic product and income from abroad.</p>
Data source	Ministry of Foreign Affairs Republic of Poland
Data availability	Annual data; since 2010
Notes	<p>Until 2017, DAC OECD methodology for data collection in Creditor Reporting System allowed for marking the sector of support only for bilateral flows. Therefore, the indicator did not cover expenditures within multilateral assistance in the form of contributions to the general budgets of international organisations working in the area of capacity building in developing countries.</p> <p>Since 2018, the leading ODA indicator has been presented as a grant equivalent including only the grant element multiplied by the value of a given flow. As a result, there is no differentiation into net and gross ODA. Additionally, some methodological activities are being conducted to incorporate other flows into ODA, such as mobilised amount of money by the public sector from the private sector instruments. Furthermore, an alternative to ODA, TOSSD (Total Official Support for Sustainable Development) is being developed as an instrument for measuring means for SDGs implementation.</p>
