Statistics for the SDGs - indicators for national priorities

Name of the indicator	**9.4.b Density of expressways and motorways per 1000 km2**
Sustainable Development Goal	'Goal 9. Industry, Innovation and Infrastructure'
Priority	Development of transport infrastructure
Definition	Percentage of persons in households living below relative poverty threshold which is determined at 50% of the mean expenditure at the level of all households.
Unit	km
Available dimentions	total
Methodological explanations	The basis for calculating the indicator is the total length of express-ways and motorways as of 31 December. In accordance with the provisions of the Act of 21 March 1985 on public roads (uniform text, Journal of Laws 2015 item 460): a) an expressway is a road specially designed for motor vehicle traffic and which: – is provided with one or two carriageways, – has multi-level crossings with any road, railway or tramway track, footpath or waterway, with rare exceptions when one-level intersections with public roads are allowed, – is equipped with devices intended for serving the travelers, vehicles and packages, and reserved only for motorway users. b) a motorway is a road specially designed for motor vehicle traffic and which: – is provided with at least two permanently separated from each other carriageways for the opposite directions of traffic, – has multi-level crossings with any road, railway or tramway track, footpath or waterway, – is equipped with devices intended for serving the travelers, vehicles and packages, and reserved only for motorway users.
