

## Statistics for the SDGs - indicators for national priorities

<b>Name of the indicator</b>	<b>13.4.b Capacity of small water retention facilities</b>
<b>Sustainable Development Goal</b>	Goal 13. Climate action
<b>Priority</b>	Increasing the country's resilience to the effects of climate change
<b>Definition</b>	Total volume of small water retention facilities.
<b>Unit</b>	dam3
<b>Available dimensions</b>	total
<b>Methodological explanations</b>	<p>Small water retention aims at reduction of the outflow of surface waters, with a balance of the natural environment by ensuring the protection and restoration of water resources. It is the ability to collect, detain and drain water in a particular place and time on the surface or in the soil, groundwater, vegetation and forest bed.</p> <p>Facilities of small retention of water are buildings and equipment for keeping most of the water in its surface and by-surface circulation. They are:</p>
