

Statistics for the SDGs - indicators for national priorities

| | |
|-------------------------------------|---|
| Name of the indicator | 13.4.b Capacity of small water retention facilities |
| Sustainable Development Goal | Goal 13. Climate action |
| Priority | Increasing the country's resilience to the effects of climate change |
| Definition | Total volume of small water retention facilities. |
| Unit | dam3 |
| Available dimensions | total |
| Methodological explanations | <p>Small water retention aims at reduction of the outflow of surface waters, with a balance of the natural environment by ensuring the protection and restoration of water resources. It is the ability to collect, detain and drain water in a particular place and time on the surface or in the soil, groundwater, vegetation and forest bed.</p> <p>Facilities of small retention of water are buildings and equipment for keeping most of the water in its surface and by-surface circulation. They are:</p> |
