

**Statistics for the SDGs - indicators for national priorities**

<b>Name of the indicator</b>	<b>13.3.c Total emissions of major air pollutants from households</b>
<b>Sustainable Development Goal</b>	Goal 13. Climate action
<b>Priority</b>	Enhancement of the role of adaptation to climate change as a means of combating climate change equivalent to mitigation
<b>Definition</b>	Total emissions of the six main air pollutants from households
<b>Unit</b>	thous. tonnes
<b>Available dimensions</b>	total "  <b>Emission of air pollutants</b> - Release of dust and gaseous pollutants into the atmosphere in the organized (through stationary point-sources) or unorganized manner (from dumps, landfills, during reloading of loose or volatile substances, through roof and window ventilation, due to forest fires, etc.).  Total emission of main air pollutants from households includes: <ul style="list-style-type: none"><li>• Sulphur dioxide</li><li>• Nitrogen oxides</li><li>• Carbon oxide</li><li>• Volatile nonmethane organic compounds</li><li>• Ammonia</li><li>• Particulates (as Total Suspended Particulates)</li></ul> "
<b>Methodological explanations</b>	
<b>Data source</b>	National Administration of the Emissions Trading Scheme
<b>Data availability</b>	Annual data, since 2010
<b>Notes</b>
