Methodological explanations	Data comes from the European Health Interview Survey (EHIS) , repeated every 5 years. The results of the study enable to get to know the health situation of the inhabitants of the Union and its conditions in connection with the demographic and social characteristics and the place of residence. The study covers four areas: • health status (including self-assessment of health status, chronic diseases, limitations in functioning and their impact on everyday life, psychological wellbeing), • health care (use of medical care, use of medicines, prophylaxis), • health determinants (mainly lifestyle and exposure to adverse environmental factors) • and demographic and social characteristics of persons and households.
Data source	Statistics Poland
Data availability	Data every 5 years; since 2010
Notes	Data presented for 2010 relate to the survey carried out in 2009.
