Statistics for the SDGs - global indicators

Notes	The presented indicator (3.3.5 Number of cases of the selected tropical diseases) is a proxy indicator to the one adopted in the official list of indicators of the UN Sustainable Development Goals. The replacement of the original indicator (3.3.5 Number of people requiring interventions against neglected tropical diseases) is due to the inability to obtain data for it. The proxy indicator has been selected so as to most fully reflect the essence of the observed phenomenon.
