

Statistics for the SDGs - indicators for national priorities

Name of the indicator	13.4.b Capacity of small water retention facilities
Sustainable Development Goal	Goal 13. Climate action
Priority	Increasing the country's resilience to the effects of climate change
Definition	Total volume of small water retention facilities.
Unit	dam3
Available dimentions	total
Methodological explanations	Small water retention aims at reduction of the outflow of surface waters, with a balance of the natural environment by ensuring the protection and restoration of water resources. It is the ability to collect, detent and drain water in a particular place and time on the surface or in the soil, groundwater, vegetation and forest bad. Facilities of small retention of water are buildings and equipment for keeping most of the water in its surface and by-surface circulation. They are:
Data source	Ministry of Infrastructure
Data availability	Annual data; since 2010
