

Statistics for the SDGs - global indicators

Name of the indicator	5.a.1.b Proportion of women among agricultural holders in the total number of private farm holders
Sustainable Development Goal	Goal 5. Gender equality
Target	5.a Undertake reforms to give women equal rights to economic resources, as well as access to ownership and control over land and other forms of property, financial services, inheritance and natural resources, in accordance with national laws
Definition	Share of women among farm users in the total number of private farm users.
Unit	percent [%]
Available dimensions	total
Methodological explanations	An agricultural holding is understood as a single unit, both technically and economically, which has a single management (holder or manager) and which conducts agricultural activity. A private farm is a farm of a natural person. Land use is understood as a real use of agricultural land.
Data source	Statistics Poland
Data availability	Data every 3 years since 2010
Notes	The presented indicator (5.a.1.b Proportion of women among agricultural holders in the total number of private farm holders) in the total number of heads of agricultural holding) is a proxy indicator to the one adopted in the official list of indicators of the UN Sustainable Development Goals. The replacement of the original indicator (5.a.1.b Share of women among owners or rights-bearers of agricultural land, by type of tenure) is due to the inability to obtain data for it. The proxy indicator has been selected so as to most fully reflect the essence of the observed phenomenon.
