

Statistics for the SDGs - indicators for regional priorities

Name of the indicator	11.E.1 Share of Local spatial management plans, the preparation of which takes more than 3 years
Sustainable Development Goal	Goal 11. Sustainable cities & communities
Priority	Spatial cohesion of sustainable cities in the region
Definition	Share of drafts of local spatial development plans that take more than 3 years to be drawn up in the total number of drafts of local spatial development plans.
Unit	percent
Available dimensions	total
Methodological explanations	A local spatial management plan – document outlining spatial plan of the municipality (planning document), adopted as a bye-law by the commune council. This document divides the land that it covers by use of dividing lines, into sub-areas with designated land functions, development principles, provision with infrastructure, and – if deemed necessary – local conditions, principles and standards for building design, as well as other conditions requiring planning regulations.
Data source	Ministry of Economic Development and Technology
Data availability	Annual data, since 2010
