

Statistics for the SDGs - indicators for regional priorities

Name of the indicator	13.C.1 The density of heating transmission and distribution network per 1 km²
Sustainable Development Goal	Goal 13. Climate action
Priority	Strengthening the role of adaptation to climate change as a means of combating climate change equivalent to mitigation
Definition	The sum of the transmission (main) thermic-line and distribution thermic-line per 1 km ² of total area.
Unit	km
Available dimensions	total
Methodological explanations	Transmission (main) thermic-line - system of pipes supplying heating agent to distribution pipes. Distribution thermic-line - system of distribution pipes supplying heating factor to household connections.
Data source	Statistics Poland
Data availability	Annual data, since 2010
