

Statistics for the SDGs - indicators for regional priorities

Name of the indicator	15.B.4 Industrial and municipal wastewater requiring treatment discharged into waters or into the ground during the year per capita
Sustainable Development Goal	Goal 15. Life on land
Priority	Modernization and expansion of sewage treatment plants and systems, as well as air protection (elimination of sources of pollutant emissions or reduction of their impact) in the regions
Definition	Total amount of industrial and municipal waste water requiring treatment discharged into water or land in the surveyed year per capita (as of 30 June of the surveyed year).
Unit	m3
Available dimensions	total
Methodological explanations	Wastewater requiring treatment - wastewater which, before being drained off to a collector, should be subjected to treatment process in whole. Data includes waste water requiring treatment, both treated and untreated.
Data source	Statistics Poland / Ministry of Infrastructure / Chief Inspectorate for Environmental Protection / Ministry of Climate and Environment
Data availability	Annual data, since 2010
