

Statistics for the SDGs - indicators for regional priorities

Name of the indicator	1.G.1 Percentage of dwellings fitted with a bathroom
Sustainable Development Goal	Goal 1. No poverty
Priority	Providing housing conditions for the most vulnerable and socially needy groups
Definition	Share of apartments equipped with a bathroom in the total number of apartments.
Unit	percent
Available dimensions	total/urban area/rural area
Methodological explanations	A dwelling is a premises consisting of one or more rooms and auxiliary rooms, intended for the permanent residence of persons, built or rebuilt for residential purposes; structurally separated by permanent walls within a building, with an independent entrance from a staircase, common corridor, common hall, street, yard or garden. A dwelling taken into account in the study is one that includes a room in which a bathtub or shower is installed, or both, and devices discharging sewage into the sewer system or to local devices (drainless tanks, domestic sewage treatment plants).
