

Statistics for the SDGs - indicators for regional priorities

Name of the indicator	2.B.5 Number of bacterial dysentery cases
Sustainable Development Goal	Goal 2. Zero hunger
Priority	Ensuring food quality, safety and food security
Definition	Cases of bacterial dysentery.
Unit	persons
Available dimensions	total
Methodological explanations	Morbidity is the frequency of new cases of a disease in the studied population. Bacillary dysentery is an infectious disease of the gastrointestinal tract caused by bacteria of the <i>Shigella</i> genus. Transmission of the infection occurs by transferring bacteria on the skin of the hands or objects to the oral cavity through contaminated food and water.
