

Statistics for the SDGs - indicators for regional priorities

Name of the indicator	9.A.2 Share of expenditures on innovation activity in enterprises in national expenditures
Sustainable Development Goal	Goal 9. Industry, innovation and infrastructure
Priority	Increased competitiveness of the region by increasing the research and innovation potential (Development of institutional potential for research and development, supporting cooperation between the research sector and the economy)
Definition	Structure of expenditure on innovation activities by voivodeship.
Unit	percent
Available dimensions	total
Methodological explanations	Innovation activity is the entirety of scientific, technical, organizational, financial and commercial activities that lead or are intended to lead to the implementation of innovation. Some of these activities are innovative in nature, while others are not new but are necessary for the implementation of innovation. Innovation activity also includes research and development (R&D) activities that are not directly related to the creation of a specific innovation. Expenditures on innovation activity in enterprises by type of innovation activity are all expenses on product innovations in business processes (up to 2015, process (current and investment)), regardless of the source of financing, incurred in the reporting year, on work completed successfully (i.e. implementation of the innovation), unfinished (continued) and interrupted or abandoned.
Data source	Statistics Poland
Data availability	Annual data, since 2008; since 2022 data in two-year cycles
