

Statistics for the SDGs - indicators for regional priorities

Name of the indicator	13.D.5 Investment outlays for the construction of small water retention facilities
Sustainable Development Goal	Goal 13. Climate action
Priority	Increasing the region's resilience to the effects of climate change
Definition	Total investment outlays for creation of small water retention facilities in a year.
Unit	thousands, PLN
Available dimensions	total
Methodological explanations	Investment outlays are financial or tangible outlays, the purpose of which is the creation of new fixed assets or the improvement (rebuilding, enlargement, reconstruction, adaptation or modernization) of existing capital asset items, as well as outlays on so-called initial investments. Small water retention aims at reduction of the outflow of surface waters, with a balance of the natural environment by ensuring the protection and restoration of water resources. It is the ability to collect, detain and drain water in a particular place and time on the surface or in the soil, groundwater, vegetation and forest bed. Facilities of small retention of water are buildings and equipment for keeping most of the water in its surface and by-surface circulation. They are:
