

Statistics for the SDGs - indicators for regional priorities

Name of the indicator	14.A.1 Share of voivodship in national marine fish catches
Sustainable Development Goal	Goal 14. Life below water
Priority	Efficient and sustainable use of marine resources for various social and economic purposes, while ensuring the durability of non-renewable resources and natural processes in the perspective of the current and future generations in the region
Definition	Share of voivodship in national marine fish catches.
Unit	percent
Available dimensions	total
Methodological explanations	Sea catches – catch data includes all fisheries products landed or transhipped at sea, regardless of their form. It does not include quantities that are thrown overboard, consumed on board, or used as fishing bait. These data refer to catches made by vessels based in one of three voivodeships (West Pomeranian Voivodeship, Pomeranian Voivodeship, Warmian-Masurian Voivodeship).
Data source	National Marine Fisheries / Statistics Poland
Data availability	Annual data, since 2010
