

Statistics for the SDGs - indicators for regional priorities

Name of the indicator	3.B.2 Average number of beds in health resort hospital and health resort sanatoria
Sustainable Development Goal	Goal 3. Good health and well-being
Priority	Improving the quality and availability of healthcare infrastructure
Definition	Average number of beds in spa hospitals and spa sanatoriums.
Unit	pieces
Available dimensions	total
Methodological explanations	The average number of beds is the sum of the number of beds as of the end of each month divided by 12, i.e. the number of months in a year. A spa hospital is a spa treatment facility whose tasks include providing a patient who has been referred for spa treatment or spa rehabilitation with: 1) 24-hour health care services in inpatient conditions; 2) 24-hour medical and nursing care; 3) procedures specified in the treatment program; 4) use of natural medicinal resources and spa treatment facilities; 5) health education. A spa sanatorium is a spa treatment facility. The tasks of a sanatorium include providing a patient who has been referred for spa treatment or spa rehabilitation with: 1) 24-hour health care services in inpatient conditions; 2) medical care and 24-hour nursing care; 3) procedures specified in the treatment program; 4) preventive services; 5) health education.
