

Statistics for the SDGs - global indicators

Name of the indicator	11.1.1 Share of total population living in a dwelling with a leaking roof, damp walls, floors or foundation, or rot in window frames or floor
Sustainable Development Goal	Goal 11. Sustainable cities and communities
Target	11.1 By 2030, ensure access for all to adequate, safe and affordable housing and basic services and upgrade slums
Definition	Percentage of persons that declared, at least in one case, that they live in a dwelling with a leaking roof, damp walls, floors or foundation, or rot in window frames or floor.
Unit	percent [%]
Available dimensions	total, urban areas / rural areas
Methodological explanations	The category of households includes persons that, at least in one case, declared that they live in a dwelling with a leaking roof, damp walls, floors or foundation, or rot in window frames or floor. The questions from the EU SILC survey: untill 2014: Does your dwelling have: a leaking roof, damp walls, floors or foundation or rot in window frames or floor? since 2015: Does your dwelling have: A. a leaking roof, B. damp walls/floors/foundation, C. rot in window frames or floor?
Data source	Statistics Poland
Data availability	Annual data; since 2010.
Notes	The presented indicator (11.1.1 Share of total population living in a dwelling with a leaking roof, damp walls, floors or foundation, or rot in window frames or floor) is a proxy indicator to the one adopted in the official list of indicators of the UN Sustainable Development Goals. The replacement of the original indicator (11.1.1 Proportion of urban population living in slums, informal settlements or inadequate housing) is due to the inability to obtain data for it. The proxy indicator has been selected so as to most fully reflect the essence of the observed phenomenon.
