

Statistics for the SDGs - indicators for regional priorities

Name of the indicator	6.C.2 Number of small water retention facilities
Sustainable Development Goal	Goal 6. Clean water and sanitation
Priority	
Definition	Number of small water retention facilities.
Unit	-
Available dimensions	total
Methodological explanations	Small water retention aims at reduction of the outflow of surface waters, with a balance of the natural environment by ensuring the protection and restoration of water resources. It is the ability to collect, detain and drain water in a particular place and time on the surface or in the soil, groundwater, vegetation and forest bed. Facilities of small retention of water are buildings and equipment for keeping most of the water in its surface and by-surface circulation. They are:
