

Statistics for the SDGs - indicators for regional priorities

Name of the indicator	7.A.2 Ratio of electricity production to its consumption
Sustainable Development Goal	Goal 7. Affordable and clean energy
Priority	Reducing the impact of energy on the environment and increasing energy efficiency
Definition	Ratio of electricity production volume to its consumption.
Unit	percent
Available dimensions	total
Methodological explanations	Electricity gross generation - energy transformations output in the form of electrical current, as measured on generator contacts. Electricity consumption is the amount of electricity delivered to domestic electricity market including: production (indigenous production) of the energy for own-account and electricity import, reduced by export and balance of domestic stocks.
Data source	Statistics Poland
Data availability	Annual data, since 2010
