

Statistics for the SDGs - indicators for regional priorities

Name of the indicator	2.B.7 Number of trichinosis cases
Sustainable Development Goal	Goal 2. Zero hunger
Priority	
Definition	Cases of trichinosis.
Unit	persons
Available dimensions	total
Methodological explanations	Morbidity is the frequency of new cases of a disease in the studied population. Trichinosis is a parasitic disease that is caused by the presence of <i>Trichinella spiralis</i> (nematodes of the <i>Trichinella</i> genus). The disease develops as a result of eating meat that has been attacked by the larvae.
