Methodological explanations	Advice provided – a service provided in an outpatient setting, including at home by a doctor, dentist or psychologist. Outpatient health care involves healthcare services provided by service providers to people who do not require treatment in 24-hour or all-day conditions. Guaranteed services in the scope of outpatient specialist care are provided in specialist clinics in cases resulting from the health condition (also at the patient's home) by a doctor with appropriate qualifications or by another person who is authorized to provide specialist services. Guaranteed services include diagnostic and therapeutic activities (including testing of collected biological material) to the extent necessary to provide the service in accordance with current medical knowledge. Guaranteed services are provided in the case of: The service provider provides the patient with the following free of charge to the extent necessary to provide guaranteed services: Outpatient specialist services are provided on the basis of a referral issued by a health insurance physician. A referral is not required for services provided by: and in the case of:
