

Statistics for the SDGs - indicators for regional priorities

Name of the indicator	4.E.3 Number of students of non-degree postgraduate programmes and PhD students per 1 thous. population of working and post-working age
Sustainable Development Goal	Goal 4. Quality education
Priority	
Definition	Number of students of non-degree postgraduate programmes and PhD students per 1 thous. population of working and post-working age
Unit	persons
Available dimensions	total
Methodological explanations	Non-degree postgraduate programmes a level of education open to holders of first-cycle qualifications and provided by a higher education institution, a scientific institute of the Polish Academy of Sciences, a research institute or the Centre for Postgraduate Medical Studies, leading upon successful completion to the award of postgraduate qualifications. Doctoral programmes third-cycle programmes open to holders of second-cycle qualifications, leading upon successful completion to the award of a third-cycle qualification conferred by an authorised organisational unit of a higher education institution, a scientific institute of the Polish Academy of Sciences, a research institute or an international scientific institute established under separate legislation, operating in the territory of the Republic of Poland. Doctoral schools operating since the academic year 2019/20 are an organized form of doctoral education, conducted by authorized universities and institutes in at least two scientific disciplines or arts. The education prepares the participant to obtain a doctoral degree and ends with the submission of a doctoral dissertation together with a positive opinion of the promoter or promoters. The doctoral school may be run by an academic university, institute of the Polish Academy of Sciences, a research institute or an international institute with a scientific category A+, A or B+ in at least 2 disciplines. Postgraduate and doctoral students are shown as many times as they study. The data are presented according to the actual location of universities and foreign units / branches. The data includes foreigners. Data until 2011 – without schools of the Ministry of National Defence and the Ministry of Internal Affairs, but including foreign units of Polish universities abroad (published at the place of the home university). Data since 2012 – including schools of the Ministry of National Defence and the Ministry of Internal Affairs, but without foreign units of Polish universities abroad. Working age population means the population of working age, i.e. for men group of the age 18-64 years, for women - 18-59 years. Post-working age population means the population at the age at which people usually end their careers, i.e. for men - 65 years and more, for women - 60 years and more.
Data source	Ministry of Science and Higher Education, Statistics Poland
Data availability	Annual data, since 2010

Statistics for the SDGs - indicators for regional priorities

Notes	Until 2016, data obtained from the Statistics Poland reporting. Since 2017, data on universities, with the exception of data on parts of universities run by churches and other religious associations, have been compiled on the basis of the Integrated Information System on Science and Higher Education POL-on administered by the Ministry of Science and Higher Education.
