

Statistics for the SDGs - global indicators

Name of the indicator	7.1.1 Proportion of population with access to electricity
Sustainable Development Goal	Goal 7. Affordable and clean energy
Target	7.1 By 2030, ensure universal access to affordable, reliable and modern energy services
Definition	The indicator presents the percentage of population with access to electricity.
Unit	percent [%]
Available dimensions	total
Methodological explanations	In international statistics, the electricity is considered as primary energy or as derived energy. The primary energy is produced from natural sources such as: water, wind, solar energy, tides and waves energy. The derived energy is produced from heat produced in the process of combustion of primary fuels (coal, natural gas) as well as from derived and renewable energy commodities and combustible wastes. The derived electricity can be also obtained from geothermal or solar heat.
Data source	Statistics Poland
Data availability	Data for 2012.
